Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species A. Claims 1-6, drawn to a method of joining tubes by constricting the outer annulus, classified in class 29, subclass 508.
- Species B. Claims 7-20, drawn to a method of joining tubes by expanding the inner annulus, classified in class 29, subclass 507.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 3726

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Louis Wagner on 10/15/04 a provisional election was made without traverse to prosecute the invention of Species B, claims 7-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-6 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rowley (US Patent No 5861200).

Regarding claim 7, Rowley discloses a process for fabricating which comprises the steps (a) reducing an outer diameter of at least a partially crosslinked polymeric tube from a first outer diameter to a smaller second outer diameter (column 13, line 55), (b) inserting crosslinked a length of said at least a partially polymeric tube having a polymeric tube at least partially into a length of a metallic tube having a metallic tube internal and external diameter, said metallic tube internal diameter being larger than said polymeric tube second outer diameter and approximately

Art Unit: 3726

equal to said first outer diameter of said at least partially crosslinked polymeric tube; and (c) heating said tubes so that said partially crosslinked polymeric tube expands in diameter to approximate said first outer diameter (column 13, lines 56-63).

Regarding claims 8-11, Rowley discloses 50% ~ 100% crosslinked polyethylene tubes (column 15, lines 12-18).

Regarding claims 12-15& 17-20, Rowley discloses extruding prior to reducing & cutting the tube (paragraph 13, line 65).

Regarding claim 16, Rowley discloses sealing an end of the polymeric tube, heating said tube, and expanding said tube via pressurization (column 14, line 3 wherein it is inherent that a seal must be established within a tube in order to pressurize said tube).

Conclusion

The prior art made of record on the attached PTO-892, and not relied upon is considered pertinent to applicant's disclosure.
